Education

2022 – 2023 Aberdeen, UK	**Masters / Information Technology** *Robert Gordon University* • **Grade:** Distinction • **Key Coursework:** Object-Oriented Programming, Software Project Engineering, Data Management, Data Visualization and Analysis, User-Centered Design, Cyber Security.
2006 – 2011 Okada, Nigeria	**BSc. / Electrical Electronics Engineering** *Igbinedion University* • **Engineering Student Association President:** Led student body, organized events, and represented engineering students in university decisions.

Skills

Languages
Python, JavaScript, Solidity, SQL, Java, C

Frameworks / Libraries
Django, React, Redux, Node.js, Next.js, Web3.js

Databases
SQL, PostgreSQL, MongoDB

Blockchain
Smart Contracts, Hardhat, DApps, ethers.js

DevOps & Tools
Docker, Git, Agile/Scrum

Other
API Integration, Full-Stack Web Development, Algorithm Design

Profile

Versatile software developer with strong expertise in Python, full-stack web development, and blockchain technologies. Skilled in creating efficient algorithms, scalable web applications, robust backend systems, and secure smart contracts. Proficient in Django, React, Next.js, and Node.js. Passionate about leveraging diverse technologies to deliver innovative solutions across various domains, including decentralized applications.

Professional Experience

2024/06 Lagos, Nigeria	**Freelance Software Developer** *Livingstone Off-the-Street Initiative* Developing digital solutions for a non-profit organization dedicated to supporting underprivileged youths. • Spearheading the development of a dynamic website to enhance NGO visibility. • Designing and implementing a robust database system to manage organizational data.

Projects

2024/09	**Crowdfunding Decentralized Application** ↗ *A decentralized application for creating and participating in crowdfunding campaigns on the Ethereum blockchain.* • **Technologies:** Solidity, Hardhat, ether.js, React, Tailwind CSS, • Implemented secure smart <u>contracts</u> ↗ for handling campaign creation, donations, and fund withdrawals.

- Developed a responsive frontend using React and integrating ether.js for blockchain interaction.

2024/04 · **Money Saving App** ⧉
Web app encouraging users to save money weekly towards goals.
- **Technologies:** React, Redux, Axios, Django Rest Framework, Knox, Google OAuth 2.0, SMTP
- Led end-to-end development of the app, integrating user authentication with Google OAuth.
- Designed a seamless user interface for managing savings plans, notifications, and progress tracking.

2023/08 · **My MSc. Final Project: DiscussU** ⧉
A Platform for students to discuss academic topics.
- **Technologies:** React, Bootstrap, Zustand, Django, Knox
- Managed full project lifecycle, including user authentication, frontend design, and backend ⧉ integration.

Awards

2023/10 · **Highest Academic Achievement Award, MSc Information Technology**
School of Computing, Robert Gordon University, Aberdeen.

Organizations

2023 – present
Aberdeen, UK
St. Mary's Cathedral 6pm Mass choir
Keyboardist

2018 – 2022
Lagos, Nigeria
Livingstone Off-the-Street Initiative
Youth Coordinator
